

CS4760CD **Type** **Dissolved**
Oxygen Sensor

— — **fluorimetric**

method

Power supply: 9~36VDC

Power consumption: $\leq 0.4W$

Signal output: RS485 MODBUS RTU

Shell material: SUS316L + POM

Water resistance rating: IP68

Measurement range: 0-20 mg/L, 0-200%

Measurement accuracy: $\pm 1\%F.S$

Pressure range: ≤ 0.1 Mpa

temperature compensation : NTC

Temperature range: 0-50°C

Calibration method: Anoxic water calibration, air calibration

Connection method: 4-core split cable

Thread: G3/4

Scope of application: General use, including river water, lakes, drinking water, and environmental protection.
